

AVI ANSH TEXTILE LIMITED

DETAILS OF BUSINESS

About Avi Ansh Textile Limited

Avi Ansh Textile Limited (formerly known as Avi Ansh Textile Private Limited) is a textile manufacturing company engaged in the manufacturing of yarn, knitted fabrics and garments. The Company was established in 2012 and has developed an integrated manufacturing setup supported by modern machinery, skilled manpower, established manufacturing processes and quality control systems.

The Company's manufacturing facility is spread across approximately **7 acres of land**, providing an integrated infrastructure for carrying out various stages of textile manufacturing operations.

Business Operations

The Company operates across multiple stages of the textile value chain, enabling it to manufacture textile products in an integrated and efficient manner. Its principal business activities include:

1. Spinning

The Company operates a spinning division with an installed capacity of approximately **27,000 spindles**. The spinning operations involve various stages including blow room, carding, drawing, roving and spinning.

The Company manufactures quality spun yarn across a range of counts, primarily from **20s to 40s**, catering to the requirements of its downstream textile and garment manufacturing operations as well as customer requirements.

The spinning division is supported by modern machinery and quality control systems to maintain consistency, strength, uniformity and other quality parameters of the yarn manufactured.

2. Knitting

The Company is engaged in the manufacturing of knitted fabrics through its knitting operations. The Company has **25 knitting machines** installed at its manufacturing facility.

AVI ANSH TEXTILE LIMITED

The knitting process converts yarn into knitted fabric of various structures and specifications, which forms an important input for the Company's garment manufacturing activities. The Company focuses on maintaining consistency in fabric quality, construction and finishing through controlled manufacturing processes.

3. Garment Manufacturing

The Company is engaged in the manufacturing of garments using knitted fabrics and other textile inputs. Its garment manufacturing operations are supported by approximately **300 sewing machines** and associated infrastructure.

The garment manufacturing process includes various stages such as fabric inspection, cutting, sewing, finishing, quality inspection and packing. The Company focuses on manufacturing garments in accordance with customer specifications and quality requirements.

The Company also intends to expand its garment manufacturing capacity to support future business growth and cater to increasing market requirements.

Integrated Manufacturing Operations

A key strength of the Company is its integrated manufacturing capabilities across spinning, knitting and garment manufacturing. The integration of these activities enables the Company to maintain better control over manufacturing processes, quality parameters and production planning.

The integrated setup also provides operational flexibility and enables the Company to efficiently manage various stages of the textile manufacturing value chain.

Manufacturing Infrastructure and Technology

The Company's manufacturing operations are supported by modern machinery and equipment sourced from reputed manufacturers from **India, Switzerland and Germany**.

The Company continuously focuses on improving manufacturing efficiency, product quality and operational capabilities through appropriate use of technology, process improvements and quality control measures.

AVI ANSH TEXTILE LIMITED

The Company manufactures and supplies a range of textile products including **spun yarn, knitted fabrics and garments**. Its products cater to the requirements of customers across the textile and apparel value chain.

The Company has established relationships with customers and retail businesses, including **Vishal Mega Mart and V-Mart Retail**, among others.

The Company also operates its own menswear brand, **TEN BY TWOO**, through which it offers apparel products to consumers.

Quality and Manufacturing Practices

Quality control is an integral part of the Company's manufacturing operations. The Company follows systematic quality control practices at various stages of production to ensure consistency and conformity with applicable customer specifications.

The Company strives to maintain product quality through process monitoring, inspection and testing at relevant stages of manufacturing.

Business Outlook

The Company remains focused on strengthening its integrated textile manufacturing capabilities and improving operational efficiency. Going forward, the Company intends to enhance its manufacturing capacity, particularly in the garment segment, and leverage its existing manufacturing infrastructure and market relationships to support sustainable business growth.

The Company will continue to focus on product quality, operational efficiency, customer relationships and prudent capacity expansion while responding to changing market requirements in the textile and apparel industry.
